Ideation and design of communication software bridging cellphones and personal computers, ensuring a secure data transfer experience. My focus included crafting an intuitive interface for effortless interaction.
Serving as a UI and UX consultant for a suburban transportation system, contributing expertise in designing an intuitive and user-friendly interface to enhance the overall user experience.

3

A dual role of UI/UX Designer and Project Manager for an application catering to municipal waste collection and recycling. This encompassed the design of two distinct Android mobile apps—one tailored for staff and the other for users. This project involved designing the elements to ensure a seamless user experience while concurrently overseeing the work of front-end developers.

4

Designing and Coordinating a comprehensive software solution aimed at delivering medical equipment and services to homes via two mobile apps (the user version and the staff version). My role involved ensuring an optimal user experience through thoughtful design while also coordinating the various aspects of the project to guarantee its successful execution.
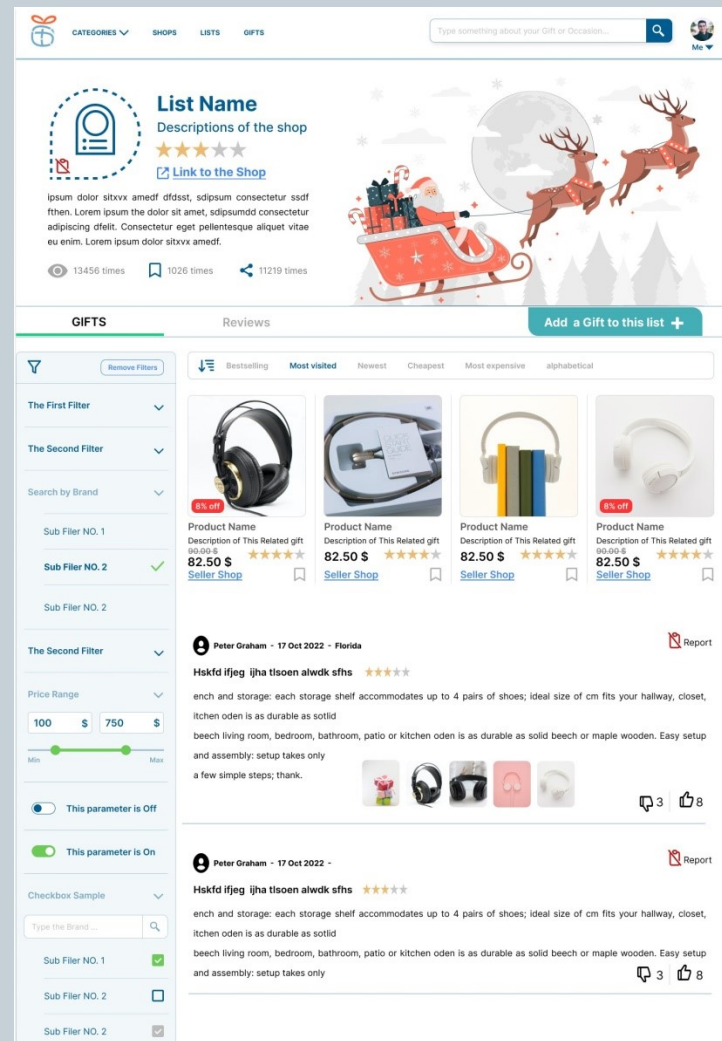

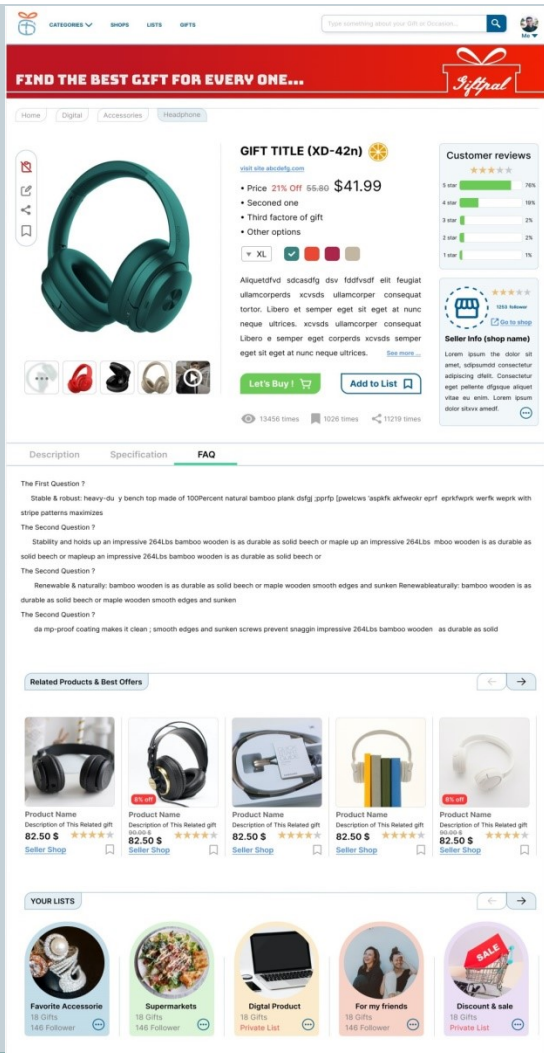

5

Designing The user interface for a local website for home maintenance services. I was the user interface designer.
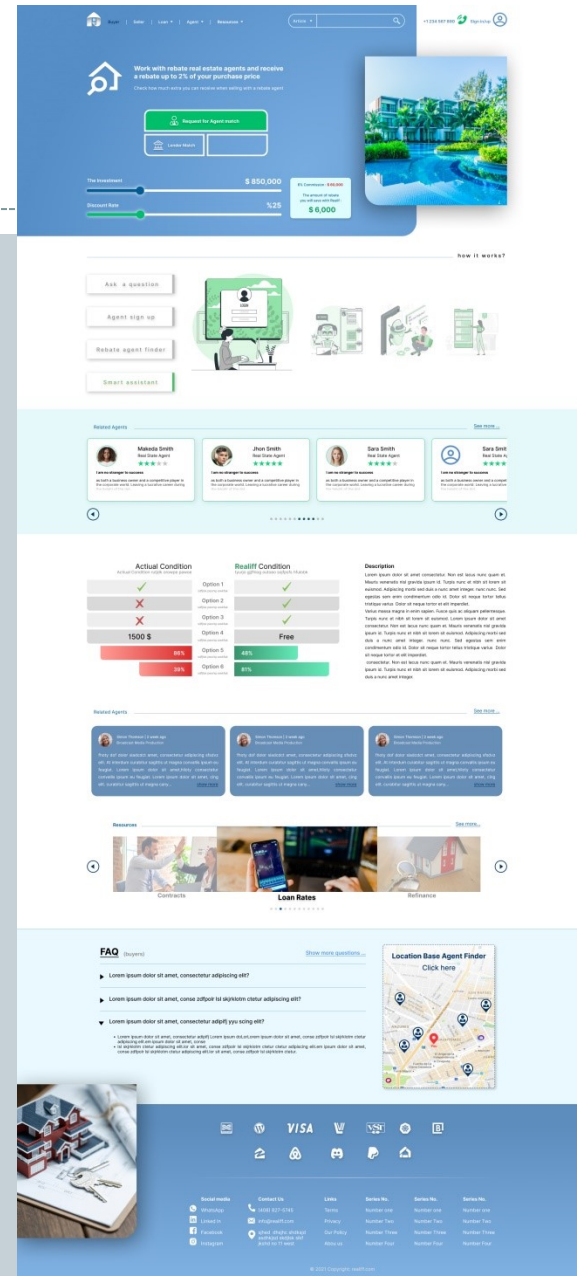

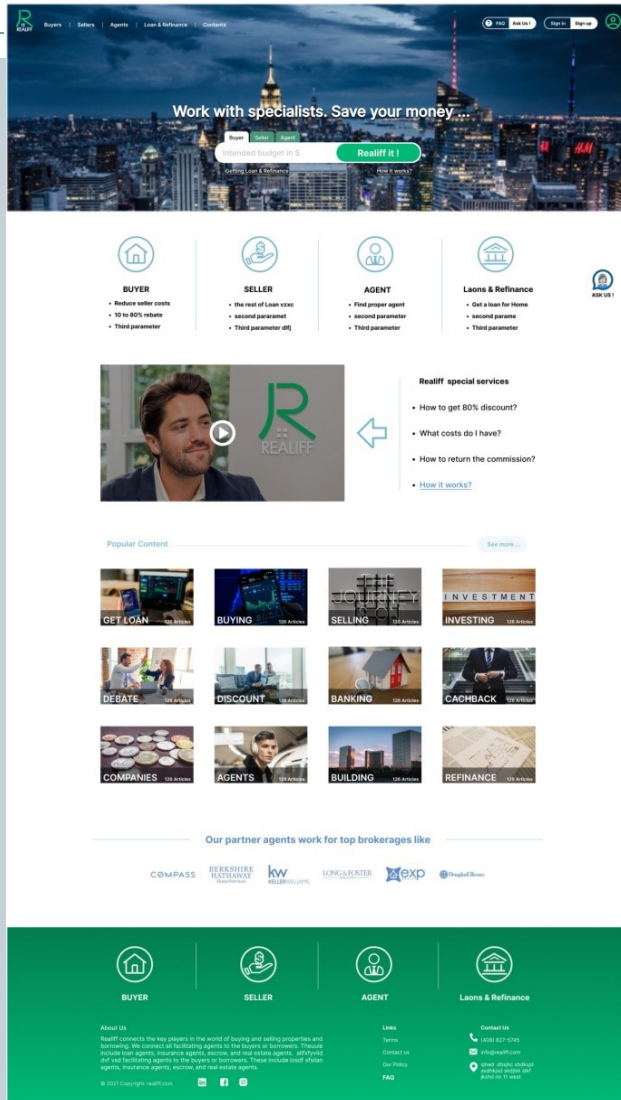

6

Key role in conceptualizing the user interface and experience for a website dedicated to facilitating the buying and selling of gift items. I was responsible for creating a visually engaging and intuitive design that seamlessly guided users through the process of selecting and exchanging goods intended for gifting purposes.
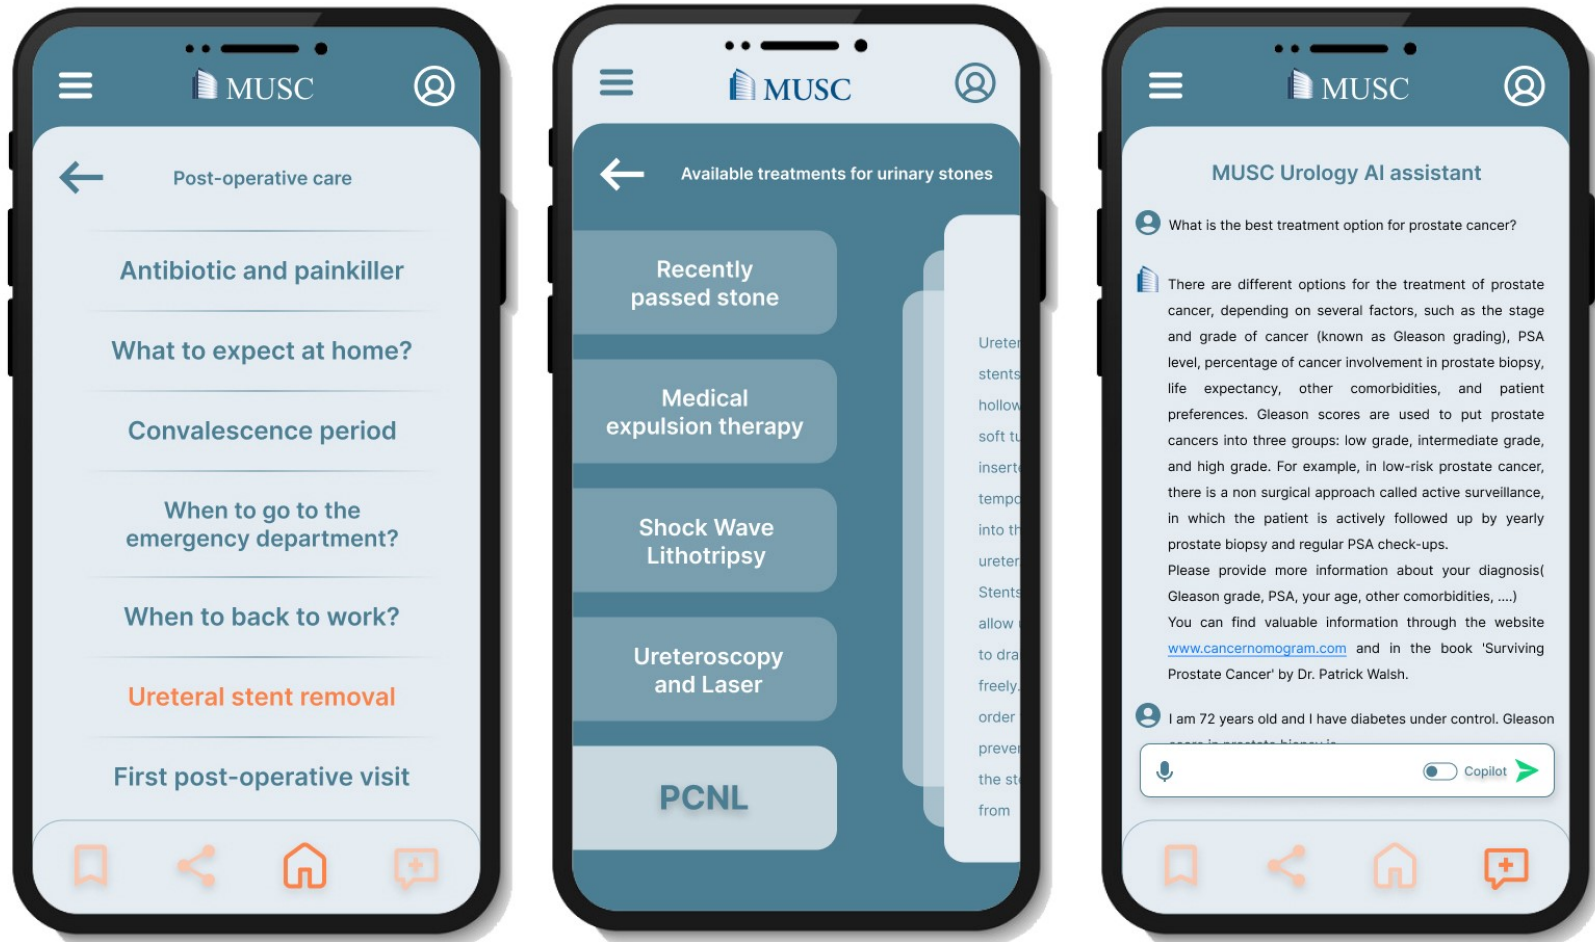

Designing the user experience also user interface and coordinating for a team dedicated to the redesign of a website focused on connecting users with real estate agents.

The concept of a comprehensive application for teaching the symptom to the patients
