Summary

UI/UX Designer with 7+ years of experience shaping digital products across SaaS, responsive websites, mobile apps, and enterprise platforms in various fields such as healthcare, municipal services, financial services, gaming, and marketplaces. Skilled at turning complex requirements into intuitive user experiences through research, high-fidelity prototypes, usability testing, and close collaboration with cross-functional teams. Passionate about improving workflows, boosting engagement, and delivering measurable outcomes.

Professional Experience

[Proguide.app](#), **United States** | Product Designer | Jan 2025 – Feb 2026 (1 Year)

- Shaped an MVP for a research-driven healthcare platform under the supervision of urologic oncology specialists at the Miller School of Medicine
- Crafted tools to deliver personalized and categorized health information for patients and physicians
- Mapped patient and physician journeys into clear, intuitive user flows
- Crafted high-fidelity interfaces to support smooth and accurate user interactions
- Coordinated closely with developers to ensure precise implementation of UI and core processes
- Contributed to projected outcomes of 50% increase in patient awareness and 30% improvement in clinic efficiency

[Giftpals.com](#), **United States** | UX/UI Designer | Dec 2022 – Nov 2024 (2 years)

- Designed a SaaS gift discovery platform leveraging the founder's market insights
- Built tools and user flows to help users find personalized gifts based on profession, age, gender, interests, and occasion
- Created features aligned with users' mental models and familiar retail patterns, supporting monetization through affiliate marketing
- Combined engaging interface design with intuitive UX patterns to enable discovery and sharing of products

- Increased user engagement, encouraged community-driven content, and contributed to overall business growth
- Conducted a usability audit and redesign, reducing testing errors by 80%

[Motorproz.co.uk](https://motorproz.co.uk), **United Kingdom** | UX/UI Designer | Sep 2023 – Feb 2024 (6 months)

- Built a website for buying and selling pre-owned cars as the initial milestone of a larger project
- Simplified processes for diverse user groups while maintaining a visually appealing interface
- Ensured compliance with legal guidelines throughout the platform

[Houmify.com](https://houmify.com), **United States** | UX/UI Designer | Jan 2021 – Oct 2022 (1 year and 10 months)

- Designed a digital solution to connect users with real estate agents and property owners, fostering a competitive marketplace
- Redesigned processes and improved user flows while aligning with pre-existing platform designs
- Developed a prototype integrating backend and database requirements

Rayan Kavesh Hirkan, Iran | Product Designer | Feb 2020 – Jan 2021 (1 year)

- Designed a municipal waste collection and recycling platform with separate Android apps for staff and users
- Streamlined workflows and user interactions across different user personas
- Developed intuitive interfaces to support seamless navigation and task completion
- Collaborated with front-end developers to ensure accurate execution of UI and product functionality

Post Bank of Iran, Iran | UX consultant | Oct 2009 – Feb 2020 (10 years and 5 months)

- Branch boss and head of bank representative offices for 8 years
- Initiated career as a UX consultant, leveraging experience with bank representative offices to analyze and refine processes for improved user and customer experiences
- Implementation of UX improvements as a consultant, leading to a 60% increase in satisfaction among agents and clients
- Design of administrative workflows and financial services processes to enhance operational efficiency
- Management and coordination of cross-functional teams to support effective project delivery
- Optimizing the payroll calculation process for agency service counters to improve the employees' economic conditions.
